# Reference Letter

6 August 2014

To Arthur Lu (Chinese name Qingjiang Lu)

Arthur Lu was employed by SweetSpotGroup Limited as a .Net developer from March 2014 to September 2014. He reported directly to me during this period.

## Job Responsibilities:

- Basing on the senior developers' designs and original requirement and using C# and relevant technique to develop web applications.
- Attending requirement meeting and providing reasonable solutions.

While working in our team, Arthur was instrumental in implementing our in house freight quoting system. He also worked with external web services, such as ebay and unleash software to implement systems integration.
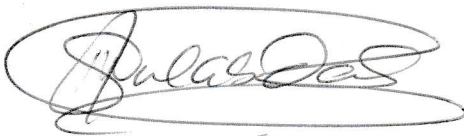

He is also not shy in taking new challengers. He took on a new project to develop a cross platform smartphone app, targeting Android, IOS and Windows Phone, and performed exceptionally well.

Arthur performed all these tasks competently and with commitment and enthusiasm. He has demonstrated the ability to work under pressure and to plan and organize successfully to meet tight deadlines. His close attention to detail has resulted in meticulous and accurate work.

Arthur was a great asset to this company and I highly recommend him for employment.

Should you require any further information please do not hesitate to contact with me.

Yours sincerely,

..................................................

Minal Gulabdas
